GOOGLE SEARCH CONSOLE

Add me in Search Console

This lets me read how people find your site in Google. It does not change the site. It does not let me publish.

ADD THIS ADDRESS

```
portal-files@matt-anthony-pho-1677791144949.iam.gserviceaccount.com
```

1. Open search.google.com/search-console and sign in with the Google account that owns the site.
2. Open your site in the property list. If you do not see it, stop and reply. I will help you add it. Do not create a second property if one is already there.
3. Click Settings at the bottom of the left menu.
4. Click Users and permissions. If that row is missing, this Google account is not an owner. Reply and tell me which account you use.
5. Click Add user.
6. Paste the address above.
7. Set the permission to Full. Do not choose Owner. Full lets me read the data and do the search work. I cannot remove you.
8. Click Add.

Reply when it is saved. I do not need your Google password. If a screen does not match, send a screenshot and I will walk you through that click.
